EXPERIENCES

Full Stack Web Developer | Colmeia Tech LTDA (feb 2017 - present)

(Prominent Brazilian startup that connects students to private tutors)

> First employee at a successful startup in Brasília, from the MVP stage until it raised its first round of investment.

> Translated mockups and designs into reusable and efficient UI components and responsive pages.

> Participated in weekly sprint meetings, and worked closely with both the marketing and design teams.

> Led an effortthe initiative to replace Bootstrap with a custom styling framework developed with Sass and BEM, increasing the efficiency of the workflow with the designers.

> Crafted from the ground-up, with the MERN stack, the platform's web backend, api and frontend pages which were used by thousands of monthly visitors.

> Successfully optimized both the website's pageload speed and SEO, ultimately achieving top rankings on organic searches.

> Proposed and implemented state-of-the-art web technologies and practices such as React, React Native, unit testing and E2E testing.

Self Employed Web Developer (feb 2017 - present)

> Collaborated with a designer partner to create and deliver digital products to multiple clients.

> Applied agile methodologies to optimize the projects development.

> Utilized cutting-edge technologies and industry standards to deliver the most reliable and functional products to the clients.

ACCOMPLISHMENTS

Workshop "Your first steps with React" | Speaker @ XIV SENE and IV IEEE Week (2019)

> Volunteered to host an Intro to React workshop at the University of Brasília, using original methodology and material.

Hackathon Caixa | Winner (2017)

> Won $4k prize at the Hackathon hosted by brazilian Insurance company Caixa, by proposing the use of IBM's Watson chatbot toolkit to support and increase insurance sales.

LANGUAGES

> Native portuguese, fluent english, intermediate japanese and spanish.
