EXPERIENCES

Frontend Engineer | Goodworld (mar 2020 - present)

(American D.C.-based fintech startup. A Techstars and 500 Startups Portfolio Company. Current raise led by Mastercard)

› Leveraged cutting-edge tools (React, Storybook, Typescript, Tailwind) to publish a private design system to unify the company's voice.

› Helped partners such as Mastercard, Citi Bank, City of Los Angeles raise thousands of dollars and impact thousands of monthly donors implementing custom donation campaign pages created with React, Next.js, Graphql.

› Took part in critical product decisions during sprint mettings and calls with partners.

Full Stack Web Developer | Colmeia Tech (feb 2017 - dec 2019)

(Prominent Brazilian startup that connects students to private tutors)

› Translated mockups and designs into efficient UI components and responsive pages using React, Node, Sass.

› Crafted from the ground-up, with the MERN stack, the platform's backend/api and the frontend, used by thousands of monthly visitors.

› Successfully optimized both the website's pageload speed and SEO, ultimately achieving top rankings on organic searches.

Self Employed Web Developer (feb 2017 - dec 2019)

(Clients include Media Plus and Clinica Faber)

› Collaborated with a designer partner to create and deliver digital products to multiple clients.

› Applied agile methodologies and modern technologies to optimize the projects' development.

ACCOMPLISHMENTS

Speaker | Workshop "Your first steps with React" @ IV IEEE Week (2019)

› Volunteered to teach an Intro to React workshop at University of Brasília. Used original methodology and material. (github)

Winner | Hackathon Caixa Insurances (2017)

› Won 1st place $4k prize. Proposed the use of IBM's Watson chatbot toolkit to support and increase insurance sales.

LANGUAGES

› Native portuguese, fluent english, intermediate japanese and spanish.
